During the pandemic patient-families are being lodged in particular at '*Private-setting*' housing: hotels, AirBnBs, in-law suites, cottage houses, corporate apartments, and vacant residences when people are away, e.g., as 'snowbirds', at the shore, and at other second homes.

AGENCY GOALS January 2022 FORWARD

To continually grow our two housing networks: (1) the *Host-home Network* with Hosts present, when Hosts and Guests are vaccinated; and (2) the *Private-setting Housing Network*, to lodge patient-families which have unvaccinated members, whether due to belief, the condition of the patient, or because there are children in the family.

For this purpose we are especially interested in developing ongoing partnerships with community and corporate organizations.
